Technical Skills

Accounts	Languages	Others	Design
> gitHub https://github.com/phoenixbox	> Ruby > CSS	> jQuery > Javascript > HTML	> Ruby on Rails > Neo4j
			> Photoshop > InDesign

Technical Projects

Socrada	A social networking data visualisation application to help statgeize your neworking. Socrada makes use of the Neo4j graph database to build node relationships. Also implemented are tranched background workers and VivaGraph.js for visualisation.	https://github.com/phoenixbox/socrada2
Tuneline	A music listening aggregation app that pulls your activity across services into one central feed. This project made good use of single table inheritance, the hStore data type and has a great user interface created with jQuery masonry.	https://github.com/phoenixbox/feed_engine
Aphagram	An Etsy clone where users could create their own stores at personal sub-domains. This project has excellent test quality, composed methods and a good use of Morris & Raphael.js to create the admin statistics dashboard.	https://github.com/phoenixbox/clonesy

Sporting Achievements

Crewed a trans-atlantic sailing yacht in the ARC rally of 2005.

Elected by over 200 of my peers and team mates to captain Blackrock College's Junior and Senior rugby teams.
